

Resolving Buffer

产品货号: R22039

产品规格: 500ml

产品简介:

Resolving Buffer Packs are pouches of dry blend powder each sufficient to make 500 mL of resolving gel buffer (1.5 M Tris buffer, pH 8.8) for handcasting polyacrylamide gels. They are easy to use—simply empty the contents of one pouch into a beaker, add ultrapure water, and stir to dissolve.

Features of the SureCast Resolving Buffer Packs include:

- Convenient—dissolve contents of one packet in water and the buffer is ready to use
- Saves time and space—no weighing, no calculations, no pH adjustment, no need to stock individual components
- Long shelf life—stocking and storage as dry powder eliminates concerns about long-term stability of stock solutions

Applications

Resolving gel buffer for casting polyacrylamide gels
